PROFESSIONAL SUMMARY

Game Engineer and Tools Developer with 13+ years of experience shipping games and backend systems. Core strengths span Unity DOTS/ECS architecture, custom shaders (HLSL/URP/HDRP), editor tooling, and real-time multiplayer infrastructure. Active backend development in Go: shipped auth, chat, and matchmaking services. Mid-level backend solid – building toward full backend ownership through self-directed projects. Delivered production titles with thousands of active users across Latin America. Available for remote work with EST/PST timezone overlap.

TECHNICAL SKILLS

– Unity & Game Client –

Unity Core: Unity 3D, C#, DOTS/ECS, UI Toolkit, Addressables, Shader Graph, VFX Graph, Unity Netcode

Graphics & Shaders: HLSL, Cg, URP/HDRP, Custom Shaders, Post-Processing, GPU Optimization

Multiplayer Client: Netcode for GameObjects, Photon, Mirror, Real-Time Sync, Player State Management

Unity Tooling: 5 custom .NET CLI tools: FolderUnity3D, UnityScriptGen, UnityTestGen, UnityScriptCore, UnityCliTools

– Backend & Server –

Backend & APIs: Go (active), C# / .NET Core 8, Node.js, TypeScript, Python, Fastify, Express.js, RESTful APIs, WebSockets

Auth & Security: JWT (access + refresh tokens), bcrypt, HTTPS/TLS, rate limiting, middleware, OWASP Top 10

Game Backend: Matchmaking systems, real-time player sync, leaderboards, WebSocket Hub pattern, goroutines

Databases: PostgreSQL, MongoDB, Redis, Firebase Realtime Database, SQL Server

DevOps: Docker, Git, GitHub Actions, CI/CD, NGINX, Unity Cloud Build

Architecture: Clean Architecture, Hexagonal, MVC, Event-Driven

PROFESSIONAL EXPERIENCE

Unity Tools & Game Developer (Contract) Aug 2025 – Sep 2025

Dardranight Studios SAS | Bogotá, Colombia

- Built immersive virtual museum tour for Elektra brand using Unity 3D
- Implemented interactive 3D environments with optimized rendering for cross-platform deployment

Senior Unity Developer & Game Backend Engineer Aug 2021 – Nov 2025

Fundación Capital | Bogotá, Colombia (Remote)

- Led Unity development of LISTA+, an educational app with thousands of active users across Latin America• Sole developer – full ownership of Unity client and C# backend services across 4 years

- Designed and maintained RESTful APIs for content management, user analytics, and gamification systems
- Integrated Firebase and Unity Analytics; maintained 99.9% uptime in production
- Implemented advanced gamification mechanics increasing user engagement and learning retention

Lead Unity Developer & Backend Integrator Jul 2018 - Nov 2020

Logisticapp | Bogotá, Colombia

- Led development of Parkés Colombiano – shipped Android/iOS turn-based multiplayer game
- Designed matchmaking system with Firebase Authentication and real-time player synchronization
- Implemented real-time chat, dynamic leaderboards, and player ranking systems
- Managed and mentored team of 5 developers using Agile/Scrum

Unity Game Developer Feb 2014 - Sep 2015

Higuera Studio | Bogotá, Colombia

- Developed reusable technical tools and gameplay systems for Unity 3D games
- Optimized performance across PC, mobile, and console platforms

Educational Software Developer Nov 2013 - Nov 2014

TORO-Labs | Bogotá, Colombia

- Built Educational Chemistry Simulator with 3D visualization, adopted by educational institutions

PROJECTS

Game Services Toolbox (Go) – gitlab.com/svgarcia7895

- Auth Service: register, login, JWT access/refresh tokens, bcrypt, HTTPS/TLS, rate limiting, /me endpoint
- Chat Server: WebSockets, Hub pattern, goroutines, broadcast channels, real-time messaging
- Matchmaking Service: player queuing, match creation, real-time player state management

Unity Portfolio Projects – gitlab.com/svgarcia7895

- RPG_Tactic: Unity DOTS/ECS, pathfinding, AI systems
- NetCodeGame: Unity multiplayer with Netcode for GameObjects
- 5 .NET CLI global tools for Unity scaffolding and code generation

EDUCATION

Technical Degree in Systems and Programming (1,600 hours)

Centro Andino de Estudios Técnicos | Bogotá, Colombia | 2007

PROFESSIONAL DEVELOPMENT

Unity & Game Dev (2023–2025): DOTS, MVC Unity 6, Shaders/Shader Graph, UI Toolkit, Unit Testing, VFX, Online Multiplayer

Backend & Architecture (2023–2025): Clean Architecture C# .NET, Hexagonal Architecture, Design Patterns ASP.NET, Node.js (37.5h), Fastify

DevOps (2023–2025): Docker, Git + GitHub, NGINX, PowerShell, TypeScript

Security: OWASP Game Security Framework v0.5.1, OWASP Top 10, defensive architecture

Foundational (2011–2016): MinTIC Django/Python, SENA Unity (40h), MVA C++, Game Production

LANGUAGES & ADDITIONAL

Spanish: Native | English: B1-B2 (Upper-Intermediate) – Professional technical communication
Global Game Jam: 2016, 2017, 2024 | Remote work experience since 2021 | Available EST/PST timezone overlap
